

BNB Miner | 'Baked Weed'

Baked Weed Miner

Baked Weed

Baked Weed the Bake-Weed original project, a BNB rewards pool ROI dApp.

Baked Weed Miner integrates into the Bake-Weed ecosystem. Where the sustainability is improved. ROI dApps have been known as 'Ponzi Schemes' and are regularly dismissed and dejected by the owners and developers.

Baked Weed was established May 6th 2022.

Offering a foreseeable and generous future with a well structured tax and rewards balance.

3% Dev fees applied to withdraws and deposits only, up to 8% daily ROI and a 12% referral bonus. Some of the best and advantageous tax structures in DeFi ROI dApps

Smart contract?

the Baked Weed Smart contract is written in it is verified on bscscan.com. Our contract is immutable ensuring investors with an added layer of security. Immutable being unable to be changed.

Audited, verified and open source the code is available to the worlds eyes.

The anti-whale mechanism algorithm in the code damages users **Weed** energy if the user decides to eat consistently. Implementation of this code created a more stable ROI dApp. The simplicity of the Baked**Weed** Smart contract has left few holes to exploit. Creating a better sense of security.
